

# vehicle mobile network radio

The new IMPULSE Wireless vehicle mobile network radio provides better coverage, reliability, and full compatability with Telstra 4GX and all Australian carriers' 4G and 3G networks.

The new 4G/LTE enabled "mobile radio" provides a "radio-like" vehicle-mounted PTT solution, which installs, looks, and operates just like a two-way radio fixed in a vehicle.

Advantages include enhanced coverage and reliability compared to other solutions, thanks to its internal Australian-approved 4GX modem; and support for 12-24VDC power input.

The new IMPULSE Wireless vehicle mobile makes for an easy transition from a radio network to PTT, since it looks and operates just like a radio.

## Specifications:

**FREQUENCY SUPPORT**  
4GX/4G/3G

**AUDIO OUTPUT**  
Front facing  
4 Watt speaker

**INTERFACE**  
Colour touchscreen, SOS button,  
auxiliary buttons, volume control

**POWER REQUIRED**  
12-24VDC, 1 amp

## SUPPLIED WITH

Fist microphone and u-clip, GPS antenna, mounting cradle and thumbscrews, mounting screws, DC power leads

## WHAT IS IMPULSE WIRELESS?

Innovative communication solution for your business.

IMPULSE Wireless combines our powerful software and customised smartphone hardware to create easy to use, two-way radio devices which communicate via our fully managed, extensive network. Our devices just work, with no set-up or configuration required – simply press to talk like you would a radio.

IMPULSE Wireless features go far beyond that of a radio, to increase your productivity while being easy to use, lightweight, and comfortable to carry. Include sophisticated GPS tracking, duress alarms, advanced safety monitoring, job dispatch, text, photo or video messaging, navigation, email, and much more.

## THE SUPERIOR FEATURES & BENEFITS OF IMPULSE WIRELESS.

### Superior radio for instant, clear communications.

IMPULSE Wireless is powered by Telstra 3G, 4G and 4GX. You benefit from complete “radio” coverage of 99% of Australia’s population and key routes. No other two-way device works out of the box with coverage anything like it.

### Seamless integration with an existing radio system.

It’s easy to bridge existing radio communication systems to your IMPULSE Wireless network, reliably and securely so that the transition is smooth and completely hassle-free for you.

### Cost effective solution, right out of the box.

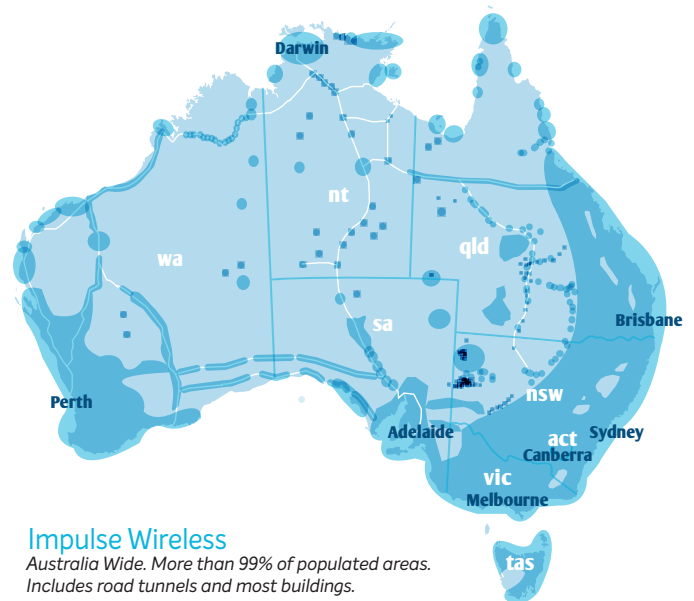

Fixed price service means no airtime charges or complicated costing systems. The complete package is ready to go immediately, saving you time and money.

### Warranty and remote support.

We offer warranties and remote support to ensure the smooth running of your devices at all times. Each device features a comprehensive help screen that explains all functions and offers solutions to standard questions and queries. It will also visually display assistance and tips, show location of buttons and functions, and demonstrate the advanced functionality.

### Everything you need in a communication device.

- Superior coverage Australia wide
- Excellent voice quality
- Highly portable and durable device
- Typical battery life exceeds 12 hours
- Intuitive, easy to use interface
- A full, comprehensive service and technical support
- Fixed price service means no airtime charges
- Advanced features available including GPS reporting and custom requirements.
